- Visual verification of the product identification mark (applied on the blocks).
- Visual verification of the presence of DCL Conformity Mark or Certificate of Conformity for the polystyrene thermal insulation core.

5.3 DM-Certification Body shall carry out initial testing of the product to verify its conformity with the Standard Specifications. Prior to initial testing, the supplier shall declare the thermal conductivity of the block.

5.4 The DM-Certification Body shall draw random samples from the factory/yard and submit the samples to an Independent Testing Laboratory for the following tests (in accordance with the test methods specified in the Standard Specification):

- 5.3.1 Compressive Strength
- 5.3.2 Dimensions
- 5.3.3 Chloride and Sulphate Content
- 5.3.4 Thermal Conductivity

Sampling and test methods shall be in accordance with those mentioned in the Standard Specifications, and the results of testing shall meet the requirements as stated therein. For thermal conductivity, the results shall not exceed the declared value.
