SUBJECT: WITHDRAWAL OF DCL CERTIFICATION

This has reference to the DCLD Circular 3419 regarding the extension of transition period in aligning the DCL Certification requirement for the thermal insulation with the Dubai Civil Defense Fire Safety Requirements which ended on the 31st of December 2018.

In view of your failure to comply with the above mentioned requirement, we regret to inform you that your current certification for **expanded polystyrene (EPS) thermal insulation** under Conformity Certificate No. CL16020326 has been withdrawn. However, your certificate may still be reactivated should you provide us copies of the fire test reports and COC from Dubai Civil Defense showing compliance with the UAE Fire and Life Safety Code of Practice before its expiry date.

Kindly be advised to refrain from using the DCL Conformity Mark and selling your **expanded polystyrene (EPS) thermal insulation** in Dubai until after you have satisfactorily complied with the Dubai Civil Defense Fire Safety Requirements and reactivated your product conformity certificate.

Regards.

ARIF HUSAIN AL MARZOOQI
Products Conformity Assessment Section Manager
