1. Background

This guideline is being prepared to achieve the strategic objectives and pillars related to integrated waste management and sustainability of the city environment, and ensuring the implementation of the 4R's of waste management such as **Refuse, Reduce, Reuse, and Recycle** of all recyclable waste materials, and ensures that recyclables are being diverted from the landfill and recycled/re-process in an environmentally sound manner.

This document explains the permit requirements for the proper recycling/reprocessing of any discarded recyclable waste materials that are generated in the Emirate of Dubai. It also specifies the accredited facilities/premises allowed to handle, store and process recyclable waste materials. This is to ensure that discarded recyclable waste materials are not only diverted from landfill but also recycled, reuse or recovered (converted) into new products in an environmental sound manner.

This document also provides the procedure in securing an online permit of recyclable waste materials from Dubai Municipality-Waste Treatment Section (DM-WTS) through Waste Disposal Service (WDS) system to send the recyclable waste materials to a DM Accredited Recycler.
