1. Introduction

Dubai Municipality prepared this guideline based on the Local Order No. (11) Of 2003 concerning Public Health and Safety of the Society in the Emirate of Dubai, in accordance with the transparency and governance aspects in the emirate of Dubai.

Compliance program assigned to maintain, monitor, and control health and safety in built environment.

Despite of control term, compliance and avoiding damage to human health may achieved when rules harmonization applied under normal or reasonably foreseeable practices considering awareness of all contributed parties.

Therefore, this guideline released to highlight parties' involvement and contribution towards compliance.

2. Purpose

This guide designed to ensure and enhance the commitment of the relevant entities to the regulations and requirements adopted in Dubai Municipality and to achieve a high level of health and safety in the built environment and enable them to monitor the extent of their commitment.

3. Objectives

- To ensure commitment with unified environmental health requirements at related business activities in the Emirate of Dubai.
- To educate related business activities owners, workers and person in charge with environmental health risks.
- To assure business continuity in line with implemented regulations.
- To raise public awareness of environmental health.

Issue Date: 27 th May 2024		Version: 4	
Superseded Issue Date: 12th Mar 2023	بیانات مفتوحة / OPEN DATA	Page 5 of 28	

4. Acts and Legislations

It is difficult for Dubai Municipality to perform its duties and specialties as an institutional organization without having a legislative system that regulates its activities, draws the framework of its relationship with the local community and gives legitimacy to its actions. Therefore, the decree issued regarding the municipality foundation has contained a provision on giving it the authority and power to issue orders, regulations and decisions.

Current Legislative Law that applies founded as per Local Order No.11, 2003 concerning public Health and Safety of the Society in the Emirate of Dubai, In addition to compliance with inspection and control procedures as per the International Standard ISO/IEC 17020.

5. Scope

Dubai Municipality shall measure and raise built environmental health compliance level in all built environment in the Emirate of Dubai, which include, but not limited to, Spa and Massage Centers, along with all parties contributed in part or all of business activity.

Where compliance level measure current measurable indicators of public health, safety, consumer products, indoor air quality and water system safety and quality.

6. Definitions and terms

Definition	Meaning
Public Health	The art and science of preventing disease, prolonging life and
Public Health	promoting health through the organized efforts of society.
	Environmental health addresses all the physical, chemical, and
	biological factors external to a person, and all the related
Environmental Health	factors affecting behaviors. It encompasses the assessment
	and control of those environmental factors that can potentially
	affect health. It targets towards preventing disease and
	creating health-supportive environments.
	The built environment touches all aspects of our lives,
	encompassing the buildings we live in, the distribution systems
	that provide us with water and electricity, and the roads,
Built Environmental	bridges, and transportation systems we use to get from place
Health	to place. Generally described as man-made or modified
	structures that provide people with living, working, and
	recreational spaces. Creating all these spaces and systems
	requires enormous quantities of materials.
	Indicate the degree of compliance that your organization has
Compliance Level	achieved for a program or to overall commitment with
	requirement, which expressed by range of grades.
	Process of identifying, assessing, and controlling threats.
Risk Management	These threats, or risks, could stem from a wide variety of
Module	sources, including all built environmental health hazards,
	strategic management errors and incidences may occur.
Catastra rhis Casa	Any event or force of nature that has disastrous,
Catastrophic Case	fatal consequences.
Comula	Confiscated original piece of product to represent product
Sample	status against applied tests and/or investigation.
Contamination	Sample impurity by exposure to or addition of a poisonous or
Contamination	polluting substance.

Definition	Meaning
	Presence or increase in our environment of chemical
Chemical Pollution	content that are not naturally present there or found in
	amounts higher than their natural background values.
Microbiological	Presence or increase in our environment of tiny, small
Pollution	organism that call microorganisms.
	Or Microbes, which are tiny living things that are found all
	around us and are too small to be seen by the naked eye.
Microorganism	Some microbes make us sick; others are important for our
	health. The most common types are bacteria, viruses, and
	fungi.
TDC	A term stands for total bacterial count used in water sample
T.B.C .	test results.
	A type of bacterium found naturally in freshwater
	environments, like lakes and streams. It can become a health
	concern when it grows and spreads in human-made building
	water systems like
	Showerheads and sink faucets
Legionella	Cooling towers
	Hot tubs that aren't drained after each use
	Decorative fountains and water features
	Hot water tanks and heaters
	Legionella that causes Legionnaires' disease commonly spread
	actively with water drizzle or sprays.
	Air in which there are no known contaminants at harmful
Acceptable Indoor Air	concentrations as determined by cognizant authorities and
Quality	with which a substantial majority (80% or more) of the people
	exposed do not express dissatisfaction.
Disposable (single use)	Any tool or device intended for one-time or temporary use.
	Refers to Heating Ventilation and Air Conditioning system.
H.V.A.C.	(Which provide the process of treating air to meet the

Definition	Meaning
	requirements of a conditioned space by controlling its
	temperature, humidity, cleanliness, and distribution).
M.V.A.C.	Refers to the Mechanical Ventilation and Air-Conditioning
M. V .A.C.	system of the building.
G.S.O.	Gulf Countries Council Standardization Organization.
G.C.C.	Gulf Cooperation Council.
	The product in its final form, directed or dedicated for (the
	service / consumption / entertainment) of the person (the
	consumer), including in the context of providing a service, and
	it was supply in the framework of a commercial purpose with
Consumer Product	It includes (e.g.: Cosmetics and personal .or without return
	care products, Fragrances, Health supplements, Detergents,
	Biocides, Food contact materials, Toys, Tobacco and its related
	products, low voltage electrical devices), and other products
	classified and included in scope of work.
	Any substance or preparation intended to be placed in contact
	with the various external parts of the human body (epidermis,
Cosmetic, Personal	hair system, nails, lips and external genital organs) or with the
Care, or Perfume	teeth and the mucous membranes of the oral cavity with an
Product	intention of exclusively or mainly to clean, perfume, change
	appearance, correct body odors, protect and/or keep these
	parts in good condition.
	Any substance or preparation containing soaps and/or other
	surfactants intended for washing and cleaning processes.
Detergent	Detergents may be in any form liquid, powder, or paste or bar
	or molded piece and marketed for or used in household, or
	institutional or industrial purposes.
	Any substance or mixture, in the form in which it is supplied to
Biocide	the user, consisting of, containing, or generating one or more
	active substances, with the intention of destroying, deterring,

	rendering harmless, preventing the action of, or otherwise
	exerting a controlling effect on, any harmful organism by any
	means other than mere physical or mechanical action.
	Any substance or mixture, generated from substances
	or mixtures which do not themselves fall under the
	first indent, to be used with the intention of
	destroying, deterring, rendering harmless, preventing
	the action of, or otherwise exerting a controlling
	effect on, any harmful organism by any means other
	than mere physical or mechanical action.
	Materials and articles that are designed to come in contact
Food Contact Material	with food when used in usual manner and manufactured from
	different.
Low Voltage Electrical	Any equipment or machine operated by electrical power with
Devices	alternate electrical voltage from (50-1000) volt, designated
Devices	for domestic or professional uses.
	Smart platform designed and presented by Dubai Municipality,
	aim to ensure the safety of consumer products, include:
Montaji	- MONTAJI smart online system: designed for traders to
	register their products as per the recommended health and
	safety specifications
	Any tag, brand, mark, pictorial or other descriptive matter,
Label	written, printed, stenciled, marked, embossed, or impressed on,
	or attached to, a container of consumer products.

8. Risk module

The following explain the Risk assessment of the severity of the potential risk & Probability of repetition:

Probability of repetition				Seve	erity of the	potential r	isk		
		Very Low	Low		Medium		High	Very High	
Almost certain		Minor	м	ajor	Crit	tical	Catastrophic	Catastrophic	
Likely		Minor	м	ajor	Crit	tical	Critical	Catastrophic	
Possible		Minor	м	ajor	Ma	ajor	Critical	Critical	
Unlikely		Minor	м	inor	Ma	ajor	Major	Major	
Very Unlikely	Very Unlikely Mi		М	Minor Min		nor	Minor	Minor	
	ſ	Probability of repetition & Severity of the potential risk indicators							
<u>Probability of</u> <u>repetition</u>		Description		<u>Risk s</u>	<u>everity</u>		Description		
Very Unlikely		Not occurred before V		Very	/ Low	No environmental health risk		health risk	
Unlikely	0	Occurred outside Dubai Low II		Insignif	Insignificant environmental health effect				
Possible	Occurred at least once in similar Addition Scope operations Addition Additaction Addition Add		Acute li	Acute limited or temporary environmental health effect					
Likely	Kno	own at least once within business scope		н	igh	1 · · ·		t environmental health fect	
Almost certain	Repe	ated in similar operat within scope	ions	Very	' High	Widesp	oread environmer	tal health effect	

The following explain the required action for the assessed risks:

RISK ASSESSMENT	Required action
Minor	Operation, activity or mission could be ran/continued with current procedures.
Major	Operation, activity or mission could be ran/ continued with current procedures, with providing recommended corrections/other way of procedures implementation.
Critical	Operation, activity or mission must be ran/ continued with current procedures , by providing mandatory corrections/other way of procedures implementation during proposed period of time and monitoring action. Must stopped in case of non-commitment within period.
Catastrophic	Operation, activity or mission must be stopped until corrections obtained, with re-assessment before re-launching operation or activity.

Note: Each requirement violation assessed to its risk based on business activity type, and upon final findings grade of establishment estimated.
