Part A : General overview

1 Introduction

Dubai Municipality prepared this guideline based on the Local Order No. (11) Of 2003 concerning Public Health and Safety of the Society in the Emirate of Dubai, in accordance with the transparency and governance aspects in the emirate of Dubai.

Compliance program assigned to maintain, monitor and control health and safety in Built environment.

Despite of control term , compliance and avoiding damage to human health may achieved when rules harmonization applied under normal or reasonably foreseeable practices taking into account awareness of all contributed parties.

Therefore, this guideline released to highlight parties involvement and contribution towards compliance.

2 Purpose

This guide designed to ensure and enhance the commitment of the relevant entities to the regulations and requirements adopted in Dubai Municipality and to achieve a high level of health and safety in the built environment and enable them to monitor the extent of their commitment.

3 Objectives

- To ensure commitment with unified environmental health requirements at related business activities in the Emirate of Dubai.
- To educate related business activities owners, workers and person in charge with environmental health risks.
- To assure business continuity in line with implemented regulations.
- To raise public awareness of environmental health.

4 Acts and Legislations

It is difficult for Dubai Municipality to perform its duties and specialties as an institutional organization without having a legislative system that regulates its activities, draws the framework of its relationship with the local community and gives legitimacy to its actions. Therefore, the decree issued regarding the municipality foundation has contained a provision on giving it the authority and power to issue orders, regulations and decisions.

Current Legislative Law that apply founded as per Local Order No.11, 2003 concerning public Health and Safety of the Society in the Emirate of Dubai, In addition to compliance with inspection and control procedures as per the International Standard ISO/IEC 17020.

5 Scope

Dubai Municipality shall measure and raise built environmental health compliance level in all built environment in the Emirate of Dubai, which include, but not limited to, consumer products dealing establishments, along with all parties contributed in part or all of business activity.

Where compliance level measure current measurable indicators of public health, safety, consumer products and indoor air quality.

6 Definitions and terms

Definition	Meaning
Public health	The art and science of preventing disease, prolonging life and promoting health through the organized efforts of society.
Environmental health	Environmental health addresses all the physical, chemical, and biological factors external to a person, and all the related factors affecting behaviors. It encompasses the assessment and control of those environmental factors that can potentially affect health. It target towards preventing disease and creating health-supportive environments.

	Document title:	Technical Guidelines for Consumer Products Dealing Establishments Compliance	اسم الوثيقة:	
	Doc Ref:	DM-HSD-GU83-ECP2	رمز الوثيقة:	

Definition	Meaning
Built environmental health	The built environment touches all aspects of our lives, encompassing the buildings we live in, the distribution systems that provide us with water and electricity, and the roads, bridges, and transportation systems we use to get from place to place. Generally described as man-made or modified structures that provide people with living, working, and recreational spaces. Creating all these spaces and systems requires enormous quantities of materials.
Compliance level	Indicate the degree of compliance that your organization has achieved for a program or to overall commitment with requirement, which expressed by range of grades.
Risk management module	Process of identifying, assessing and controlling threats. These threats, or risks, could stem from a wide variety of sources, including all built environmental health hazards.
Catastrophic case	Any event or force of nature that has disastrous, fatal consequences.
Sample	All, part, quantity or part of the confiscated original material or product to represent its status against applied tests and/or investigation.
Contamination	Sample impurity by exposure to or addition of a poisonous or polluting substance.
Microorganism	Or Microbes, which are tiny living things that are found all around us and are too small to be seen by the naked eye. Some microbes make us sick, others are important for our health. The most common types are bacteria, viruses and fungi.
Chemical pollution	Presence or increase in our environment of chemical content that are not naturally present there or found in amounts higher than their natural background values.
Microbiological pollution	Presence or increase in our environment of tiny small organism that call microorganisms.

8 Risk module

The following explain the Risk assessment of the severity of the potential risk & Probability of repetition:

Probability of repetition	Severity of the potential risk				
	Very Low	Low	Medium	High	Very High
Almost certain	Minor	Major	Critical	Catastrophic	Catastrophic
Likely	Minor	Major	Critical	Critical	Catastrophic
Possible	Minor	Major	Major	Critical	Critical
Unlikely	Minor	Minor	Major	Major	Major
Very Unlikely	Minor	Minor	Minor	Minor	Minor

Probability of repetition & Severity of the potential risk indicators			
<u>Probability of repetition</u>	<u>Description</u>	<u>Risk severity</u>	<u>Description</u>
Very Unlikely	Not occurred before	Very Low	No environmental health risk
Unlikely	Occurred outside Dubai	Low	Insignificant environmental health effect
Possible	Occurred at least once in similar scope operations	Medium	Acute limited or temporary environmental health effect
Likely	Known at least once within business scope	High	Chronic or permanent environmental health effect
Almost certain	Repeated in similar operations within scope	Very High	Widespread environmental health effect

The following explain the required action for the assessed risks:

RISK ASSESSMENT	Required action
Minor	Operation, activity or mission could be ran/continued with current procedures.
Major	Operation, activity or mission could be ran/ continued with current procedures, with providing recommended corrections/other way of procedures implementation.
Critical	Operation, activity or mission must be ran/ continued with current procedures , by providing mandatory corrections/other way of procedures implementation during proposed period of time and monitoring action. Must stopped in case of non-commitment within period.
Catastrophic	Operation, activity or mission must be stopped until corrections obtained, with re assessment before re launching operation or activity.

Note: Each requirement violation assessed to its risk based on business activity type, and upon final findings grade of establishment estimated.

Part E : Business activity Annexes.

Annex 1: Public health and safety requirements

Requirement	Risk
Compliance of premise activity, using or practice as per license or related permit issued.	Major
Proper preventive measures for the protection and control of disease spread and outbreaks.	
Absence of workers have wounds, injuries or infected during the work, which may affect his/her health, or others health and safety.	Catastrophic
Providing approved workflow in quarantine cases upon request.	Major
Maintain personal hygiene and cleanliness level.	Major
Maintain premise general cleanliness and hygiene level inside all premise facilities.	
Cleaned meshed windows to prevent entry of insects and rodents.	Critical
Toilets & bathing facilities cleanliness.	Critical
Cleaned wash basins, Floors and walls	Critical
Presence of an effective pest (e.g.: rodents and insects) control operations.	
Absence of rodents and Insects or signs of the same.	Critical
Presence of valid pest (e.g.: rodents and insects) control operations contract.	Major
Presence of cleaned drinking water supply and devices.	Critical
Presence of an effective disposal of bio-hazardous and general waste materials including consumer products and furniture.	Critical
Reuse of empty chemicals and detergents containers by any means is not allowed with safe proper way of disposal.	Major
Presence of valid disposal contract of bio-hazardous and general wastes including consumer products and furniture.	Major
Presence of proper healthcare services, installation and utilities.	
Availability of sufficient suitable hands and/or Hair washbasins.	Major
Availability of sufficient suitable toilets & bathing facilities.	Major
Availability of hot / cold-water source.	Major
Presence of proper drainage system for activity waste.	
The outlet from the machines shall be properly drained into gutter/ drain line.	Critical
Proper disposal of waste oil and refrigerant disposed.	Critical
The drain line shall be covered at the same floor level without any difference in surface profile, elevation or made.	Critical
Availability of suitable, sufficient and periodically cleaned bio-hazardous and general wastes including consumer products and furniture containers.	
Provision of Sufficient and suitable auto-covered waste bins.	Critical

Availability of suitable sanitizing and disinfecting materials.	Major
Availability of suitable cleaning materials.	Major
Providing valid environmental health related documents or No objection permits for premise and employees upon request.	
Availability of updated all staff list upon request.	Major
Providing valid occupational health certificates for employees and labors upon request.	Major
Commitment and adherence to the Dubai Municipality environmental health practices, instructions, orders and circulars.	
Healthy practices, use and treatment.	Critical
Applications and declarations before certain types of work begins.	Critical
Premise notifications and reporting for incidences may affect Environmental health.	Critical
Premise compliance with smoking regulation.	
Place No-smoking sign in a prominent visible and suitable place inside premise, and not allow smoking.	Critical
Cigarettes ashtrays shall be placed at a distance of 7.5 meters away from the entrances or the exit of the building.	Critical
Removal of cigarettes ashtrays from all sites or areas where smoking is prohibited.	Critical
Suitability of building/premise construction and design specifications, with intended activity, as per environmental health requirements.	
Availability of proper disposing gas, fumes and heat facilities as per activity.	Critical
Presence of suitable, sufficient special facilities as per activity layout requirement.	
The activity Halls/ Places shall be available and suitable.	Major
Availability of suitable sufficient waiting rooms and/or areas.	Major
Providing valid safety related documents or No Objection permits upon request.	
Availability of sensors and devices calibration records.	Major
Availability of valid sensors and devices certification.	Major
Provide appropriate safety methods for working in confined spaces.	Major
Provide layout, tools and controlling, precautionary and preventive system in emergency and fire cases, maintained by certified body as per UAE Fire and Life Safety Code of Practice	
Providing valid Fire extinguishers means.	Critical
Additional stop bars/switches shall be provided for emergency stop.	Critical
Availability of proper first aid box and tools, according to the concerned authorities' regulations.	Critical
Availability of proper entrances/exits.	Critical
Providing fire-exit layout signs.	Critical
Rooms, corridors and outlets are equipped with Heat and/or Smoke detectors.	Critical
Presence of fire alarm and main panel as per licensed activity.	Critical
Providing proper and adequate facilities for disposing gas, fumes and heat.	Critical
Presence of fire protection requirements completion certificate issued by Civil Defense Department.	Critical
Availability of applicable and well-known premise evacuation plan and safe assembly points.	Critical
Availability of adequate evacuation plan trials record as per licensed activity.	Critical

Assembly points used in emergency cases, not in parking areas, and found near to premise entrances for disabled.	Critical
Free accessed staircases in emergency.	Critical
Illegal consumer products deal /handling of the medicines are not allowed.	Critical
Using building facilities safely with related permissions.	
Safety requirements in permitted Kitchens and Food Preparation Areas, according to technical guidelines.	Critical
Suitable area size with number and size of machines and number of workers.	Critical
Keeping windows and balcony doors closed as per premise-licensed activity.	Critical
Licensed constructions/Wooden partitions.	Critical
Non-slippery, impermeable, friction and rust resistant floors.	Critical
Presence of sufficient work/activity area.	Critical
Premise walls, floors and ceilings made shall be from approved materials.	
Using proper tiles with facility operations.	Critical
All structural materials are fire resistant.	Critical
Proper securing (use and handling) of liquefied petroleum gas cylinders and flammable materials	
Presence of adequate non-smoking and warning signs all around flammable materials.	Critical
The chemicals drum / containers shall be labeled properly.	Critical
Availability of product data sheets from the suppliers for all hazardous substances upon request.	Critical
Not to deal in expired, spoiled or deteriorated consumer products.	Critical
Availability of proper storage mechanism of consumer products, tools and materials.	
Lift rooms, moving transport systems, and electricity as storage places.	Major
Fire-fighting equipment cabinet not used as storage area.	Major
Sufficient number of separate steel shelves or rack (elevated 20 cm above floor and 50 cm down ceiling)	Critical
Presence of calibrated thermometers.	Major
Presence of temperature log file for refrigerators or freezers.	Major
Presence of suitable sufficient cabinets, drawers and shelves.	Major
Presence of management representative or acting manager, for example: Person in charge, Safety engineer, Professional technician or health officer.	Major
Allow and assist Dubai Municipality employee from performing duties.	Critical
Wearing proper uniform.	
staff wearing suitable shoes during work	Minor
Presence of proper maintenance level, which may affect built environmental health.	
Maintenance of electrical equipment and devices including non-electrical manual equipment.	Critical
Commitment and adherence to the Dubai Municipality environmental health practices, instructions, orders and circulars.	Critical
Presence of Safety instructions and work site risks awareness materials and procedures.	
Availability of safety instructions, operational guidance signboards and tools adequately.	Major
