1. Biocidal Products

A biocide is intended to give antibacterial, antimicrobial, disinfecting or sanitizing properties with the intention to destroy, make harmless or control harmful organisms such as bacteria or viruses by means other than mere physical or mechanical action.

2. How to know if a product is a biocide?

The label of a biocidal product will claim a biocidal effect such as.

- Antibacterial,
- Antimicrobial,
- Antifungal,
- Sanitizing, and
- Disinfectant, ... etc.

3. Safety Measures that should be covered while using Professional use / Business-to-Business “B2B” Biocides Products

The supplier of professional use product should provide safety data sheet / technical data sheet when selling the product to the end users professionals which should cover the below:

- The name(s) of the biocidal active ingredient(s) and its concentration in the product
- The type of product formulation
- What the product is approved for (Scope)
- Details of any restricted users i.e. for general public or professional/industrial use only
- Instructions on handling, storage, application, use and disposal of the biocide,
- Details of any protective clothing or equipment which must be worn when using the biocide, and Whether access to treated areas needs to be restricted.

- If the product is classified as hazardous, it must be hazard labelled in accordance with the rules set out in the classification and labelling legislation as below:
 - Biocidal products which are classified as hazardous, and which are sold to professional users must have a Safety Data Sheet (SDS) that outlines the hazard and safety information for the product.
 - Hazard pictogram indicating the hazard concerned as per the criteria of Global Harmonized System for classification of chemicals “GHS.”
 - Signal word
 - Hazard statements describing the hazard-ous effect e.g. Harmful if inhaled
 - Precautionary statements to allow the user of the chemical to take measures to protect health / environment.
