

**Circular No. (13-2-1) of 2021G**

**Dated 23/08/2021G**

**On/ Evaluation of Engineering Contracting Companies  
(Engineering Excellence)**

**Messrs. Engineering consulting offices and construction contracting companies,  
Greetings,**

The engineering excellence system aims to motivate contracting companies to sustain excellence and win first places, by assessing the extent of compliance with the regulations, laws, and standards in force in the Emirate. Contracting companies are evaluated through (2) main axes that include (8) standards, as follows:

**Axis 1: Registration, Qualification, and Practice Requirements:**

1. The extent of compliance with meeting annual renewal requirements
2. The extent of compliance with the continuous application of standards of practice
3. Maintaining a record free of violations related to the practice of engineering professions

**Axis 2: Requirements for Implementation and Supervision of Projects:**

1. The extent of compliance with security and safety requirements
2. The extent of compliance with building laws, regulations, and legislation during the periodic inspection process.
3. Maintaining a record free of technical complaints related to construction work
4. The extent of compliance with the requirements for submitting a structural inspection transaction
5. The extent of compliance with completion requirements

It should be noted that the evaluation shall be conducted periodically, on an annual basis, according to the type of building, and shall be published within the open data announced by the Municipality as of January 2019.
