

Circular No. (5-1-1) of 2021 AD

On 23/8/2021 AD

Concerning Fire Prevention

M /s. Engineering Consulting Offices, Construction Contracting Companies and Suppliers

and developers in the Emirate of Dubai

After Greetings,

It is prohibited to use any flammable materials or any materials whose manufacture includes flammable materials or any systems that would weaken the ability of the materials used to resist ignition or help in the spread of fire, including thermal insulation materials such as rock wool, polystyrene, bitumen, and fixing and installation materials that have flammability, except after their approval by the General Directorate of Civil Defense in Dubai and according to the latest version of the UAE Fire and Life Safety Code.

“This is a technical translation, in case of ambiguity Arabic version will prevail “
