

Circular No. (6-2-1) of 2021 AD

On 23/8/2021 AD

regarding Electronic Parking Control Systems

M /s. Engineering Consultancy Offices and Construction Contracting Companies

After Greetings,

- The consultancy offices shall prepare the necessary designs to provide the buildings of commercial centers and public buildings that include 150 or more parking spaces or that include three or more floors allocated in whole or in part as parking slots with electronic control systems indicating the locations of vacant parking spaces and the general condition of each floor, with the inclusion of the items of basic equipment required to be implemented in the buildings by the contractors to implement the construction works.
- Consulting offices must technically supervise the implementation of these systems and ensure that they work in accordance with the specifications of the manufacturers and in a manner that achieves the fullest expectation from them.
- Consulting offices must prepare the necessary designs and documents to add these systems to all projects that are licensed or approved and have not been received by the contractor or are being implemented.
