

Circular No (8-2-1) of Year 2021

On 23/8/2021

On products and materials used in waterproofing systems

**Messrs., Engineering Consulting offices, Construction Contracting Companies ,
Suppliers and Manufacturers,**

After Greetings,

It is permitted to use integral waterproofing systems for all concrete building elements including substructures concrete elements without the need to use other waterproofing systems at the same time such as (Rubberized Bitumen) or (waterproofing membrane) as per the appropriate requirements:

1. Obtaining a certificate of conformity for integral waterproofing systems materials from Dubai Central Laboratory Department.
2. The approval of integral waterproofing systems by Building Permits Department at Dubai Municipality in accordance with the approval requirements stipulated in the below annex [8-2-1-1](#).

“This is a technical translation, in case of ambiguity Arabic version will prevail “
