

Circular No. (12-3-1) of 2021

Dated 23/08/2021

On/ Using Fences for Demolition Work Sites

**Messrs. Engineering consulting offices and contracting companies,
Greetings,**

Demolition and rubble removal companies and contracting companies shall adhere to the following instructions:

- Placing white iron bars of 1 m tall on the sides overlooking paved streets to prevent cars from entering the vacant lands after the buildings have been demolished. This shall be done one week after the end of demolition works before the building permit is issued.
- After the building permit is issued, the project contractor shall place a temporary fence around the land upon starting work on the site.
- Both parties shall be jointly responsible for the consequences.

“This is a technical translation, in case of ambiguity Arabic version will prevail “
