

Circular No. (12-5-1) of 2021
Dated 23/08/2021
On/ Exploiting Construction Sites

Messrs. Engineering consulting offices and contracting companies,
Greetings,

- All engineering offices and contracting companies may not allow workers and those involved in carrying out construction work to live or stay overnight inside the construction site, except for guards or technicians required to manage the site in accordance with the requirements of work.
- It is not permissible to establish temporary canteens, kitchens, or restaurants inside work sites.
- All necessary requirements and equipment, including lighting, ventilation, water, sewage system, etc., shall be provided in accordance with the Construction Works Safety Practice Guide for all temporary facilities, including offices for engineers and contractors, guards' housing rooms, and stores for keeping equipment and materials used within the construction site or the site licensed to be used for this purpose.
- The necessary and appropriate fire prevention systems shall be provided in accordance with the specifications and controls prescribed in this regard by the competent authority in the Emirate.
