

Circular No. (12-8-1) of 2021

Dated 23/08/2021

On/ Warning Lights at Construction Sites

**Messrs. Engineering consulting offices and construction companies,
Greetings,**

All contracting companies and consulting offices shall adhere to meeting security and safety requirements at construction sites in accordance with the Construction Works Safety Practice Guide approved by Dubai Municipality. They shall ensure that cranes and high-rise buildings under construction are equipped with warning lights as follows:

1. Tower cranes and mobile cranes whose height exceeds 30 meters
2. Buildings under construction whose height exceeds 60 meters
3. Providing all tower cranes with floodlights to provide lighting for the site during night shifts
4. Taking the necessary measures to ensure that the site is illuminated with warning lights during vacations, during periods when work is discontinued, or when there is a lack of visibility during daytime due to weather conditions.

Construction companies and consulting offices shall take necessary measures to ensure meeting the above requirements and to fully supervise the effectiveness of warning lights.
